Maintenance technicians are responsible for the repair, service, troubleshooting and upkeep of the mechanical, hydraulic, pneumatic, electrical and control systems of machines and facilities throughout many industries.

The day-to-day duties and knowledge required of a maintenance professional depend largely on where they work and the specific type of machinery they maintain. However, there are many foundational skills, common to all maintenance environments, that help a maintenance technician achieve success in any environment. Maintenance Fundamentals is designed to provide participants with a solid grasp of those foundational skills.
